

FARSITE Change Log

FARSITE Version 4.1.055 Release Date, May 27, 2008

- Version 4.1 of *FARSITE* supports the expanded set of 40 standard fuel models developed by Scott and Burgan (2005).
- Project (.FPJ) and Bookmark (.BMK) Files created in version 4.0 are fully compatible with version 4.1. Simply open the existing files the same way you did in version 4.0.
- The new Custom Fuel Model (.FMD) File format was designed to be interchangeable between fire behavior applications. For example, custom fuel models created in BehavePlus v.3 can be saved in the .FMD format used in FARSITE v4.1.

FARSITE Help File Release Date, April 3, 2007

- Version 4.1.055 of FARSITE contains the help file (far4help.chm), but earlier installations of version 4.1 do not.
